

User Acceptance Testing (UAT) Template

Team ID	SWTID-2026-7899
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	

Project Overview:

Project Name: Auto Ticket Classification using Flow Designer

Project Description: A ServiceNow no-code automation for a school IT helpdesk. When a ticket is created, a Flow Designer flow reads the Short Description, assigns Category and Subcategory by keyword, and emails the caller a confirmation.

Project Version: 1.0 (Project Update Set)

Testing Period: 01-10-2026 to 03-10-2026

Testing Scope:

Features / functionalities: custom table *School IT ticket* with 9 fields; Category / Subcategory dependent choices; flow *Auto Classify School IT Tickets* (trigger, keyword conditions, Update Record); confirmation email; update set export.

Requirements tested: (1) classify tickets from the issue description, (2) assign Category and Subcategory without manual work, (3) dependent choice logic, (4) automatic email to the caller, (5) structured ticket data, (6) easy maintenance and deployment.

Testing Environment:

URL/Location: <https://dev343140.service-now.com> (ServiceNow developer instance)

Credentials (if required): Administrator account of the developer instance (not shared in this document)

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Create custom ticket table and fields	1. Open System Definition > Tables 2. Create table School IT ticket 3. Enable auto-number 4. Add fields in Form Design	Table u_school_it_ticket is created with all required fields and auto-number	Table created; ticket numbers generated (SCH0001002, SCH0001006)	Pass
TC-002	Dependent choice: Category Network	1. Open new ticket form 2. Select Category = Network 3. Open Subcategory list	Only Wi-Fi is listed	Only Wi-Fi is listed	Pass

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-003	Dependent choice: Category Hardware	1. Select Category = Hardware 2. Open Subcategory list	Only Projector is listed	Only Projector is listed	Pass
TC-004	Dependent choice: Category Performance	1. Select Category = Performance 2. Open Subcategory list	Only Slow Computer is listed	Only Slow Computer is listed	Pass
TC-005	Dependent choice: Category Access	1. Select Category = Access 2. Open Subcategory list	Only Forgot Password is listed	Screenshot to be re-captured	Pending re-test
TC-006	Confirmation email to caller	1. Create a ticket with a Caller 2. Open System Logs > Emails 3. Search the subject and Preview Email	Email "Your Request for the issue has been submitted" is created for the caller	Emails created for abel.tuter@example.com; preview shows ticket confirmation message	Pass
TC-007	Auto-classification by keyword	1. Create a ticket with Caller and Short Description only (Category empty) 2. Save and reload	Category and Subcategory are filled by the flow	Re-test with Category left empty to be recorded	Pending re-test
TC-008	Negative: no matching keyword	1. Create a ticket with a Short Description that has no keyword 2. Save and reload	Category stays empty for manual review	Not yet executed	Pending re-test
TC-009	Deploy via update set	1. Mark Project Update Set Complete 2. Click Export to XML	XML file is downloaded	Update set Complete (43 customer updates); XML downloaded	Pass

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	Subcategory field label is misspelled as "Subcatogary" on the ticket form	1. Open the School IT ticket form 2. Read the Subcategory label	Low	Open	Correct the label to Subcategory
BG-002	Keyword spelled "WiFi" is not matched when the flow condition is Wi-Fi or Network	1. Create a ticket with Short Description "WiFi not working" 2. Save and reload	Medium	Open	Add WiFi, Login, Slow and Hanging keywords as in the requirement

Test Evidence:

This screenshot shows the 'Table record' form in ServiceNow. At the top, there's a yellow banner with a tip about creating custom tables. Below it, a blue box explains that a table is a collection of records. The form fields include: Label (School IT ticket), Name (u_school_it_ticket), Extends table (empty), Application (Global), Create module (checked), Add module to menu (dropdown with 'Create new'), New menu name (School IT ticket), and Remote Table (unchecked). The 'Application Access' section is expanded, showing 'Accessible from' (All application scopes) and permissions: Can read (checked), Can create (unchecked), Can update (unchecked), Can delete (unchecked), Allow access to this table via web services (checked), and Allow configuration (checked). 'Submit' and 'Cancel' buttons are at the bottom.

TC-001: School IT ticket table creation

This screenshot shows the 'Create SCH0001006 | School IT ticket' form. The title bar indicates it's in Microsoft Edge. The URL is https://dev343140.service-now.com/u_school_it_ticket.do?&sysparm_clear_stack=true&sysparm_reference=u_school_it_tick... The form fields include: Number (SCH0001006), State (New), Caller (Abel Tuter), Category (Network), Subcategory (Wi-Fi), Short Description (Network issue), and Description (empty). There are also fields for Assigned Group and Assigned to. A 'Submit' button is at the bottom left.

TC-001: Test ticket SCH0001006 (Network / Wi-Fi)

This screenshot shows the 'School IT ticket - Create SCH0001002' form. The form fields include: Number (SCH0001002), State (-- None --), Caller (empty), Category (Network), Subcategory (-- None --), Short Description (Wi-Fi), and Description (empty). There are also fields for Assigned Group and Assigned to. A 'Submit' button is at the bottom left.

TC-002: Category Network shows Wi-Fi

This screenshot shows the 'School IT ticket - Create SCH0001002' form. The form fields include: Number (SCH0001002), State (-- None --), Caller (empty), Category (Hardware), Subcategory (-- None --), Short Description (empty), and Description (empty). There are also fields for Assigned Group and Assigned to. A 'Submit' button is at the bottom left.

TC-003: Category Hardware shows Projector

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
