

Acceptance Testing

UAT Execution & Report Submission

Team ID	SWTID-2026-7899
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

1. Purpose of Document

The purpose of this document is to briefly explain the test coverage and open issues of the **Auto Ticket Classification using Flow Designer** project at the time of its release to User Acceptance Testing (UAT). The solution automatically classifies School IT helpdesk incidents (Wi-Fi, Projector, Forgot Password and Slow Computer) into the correct Category and Subcategory using ServiceNow Flow Designer, and sends a confirmation email to the caller.

2. Defect Analysis

This report shows the number of resolved or closed defects at each severity level during UAT of the *Incident WorkFlow* table, the Category/Subcategory dependency, the flow logic and the email notification, and how they were resolved.

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	0	1	1	2	4
Duplicate	0	0	1	0	1
External (email/SMTP setup)	0	1	0	0	1
Fixed	2	3	3	4	12
Not Reproduced	0	0	1	0	1
Skipped	0	0	0	1	1
Won't Fix	0	0	1	1	2
Totals	2	5	7	8	22

Examples of defects fixed: keyword typo in the Projector condition ("Prajector"), Wi-Fi vs. WiFi keyword mismatch in the Short Description condition, and Subcategory choices not filtering until the dependent value was mapped to the Category backend value.

3. Test Case Analysis

This report shows the number of test cases that have passed, failed, and remain untested.

Section	Total Cases	Not Tested	Fail	Pass
Custom Table & Field Configuration	9	0	0	9
Category / Subcategory Dependency	4	0	0	4
Flow Designer Auto Classification	8	0	0	8

Email Notification to Caller	3	0	0	3
Security & Access Control (ACL)	2	0	0	2
Update Set Deployment (Export to XML)	3	0	0	3
Totals	29	0	0	29

4. Test Scenarios Executed

Scenario	Input (Short Description)	Expected Result	Status
TS-01	WiFi / Wi-Fi not working in library	Category: Network, Subcategory: Wi-Fi; email sent to caller	Pass
TS-02	Projector not turning on	Category: Hardware, Subcategory: Projector; email sent	Pass
TS-03	Forgot password / login issue	Category: Access, Subcategory: Forgot Password; email sent	Pass
TS-04	Computer is slow / hanging	Category: Performance, Subcategory: Slow Computer; email sent	Pass

5. Conclusion

All executed test cases passed. The flow classifies tickets correctly, the dependent Subcategory choices behave as expected, auto-numbering generates unique ticket numbers, and the caller receives the submission email. The solution is accepted for deployment via the completed Update Set.
